

Information about health screening for colorectal cancer

1 You will be invited to have a test.

2 It is a test to check your stool.
Taking part means using a self-test at home.

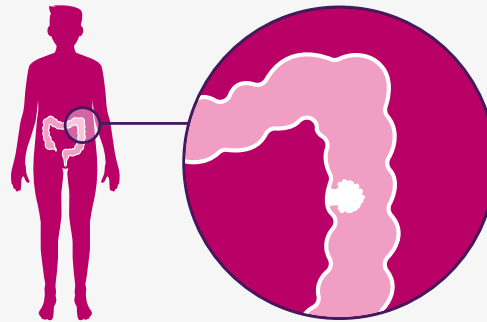

3 You can read the instructions in the test kit.

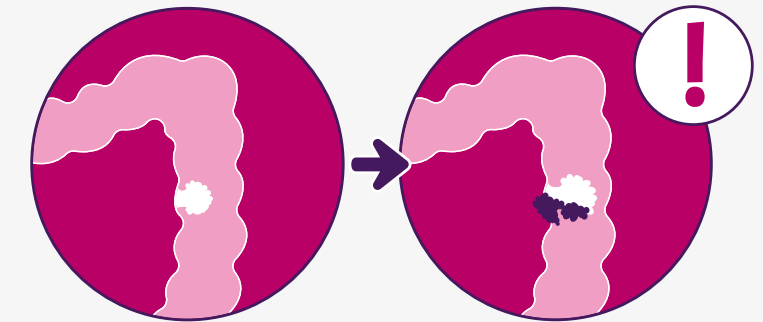

4 Why is this test important?

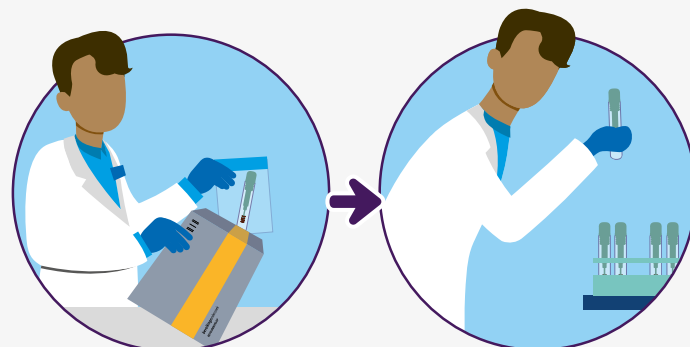

5 Polyps can form in the intestines.
A polyp is a small lump.

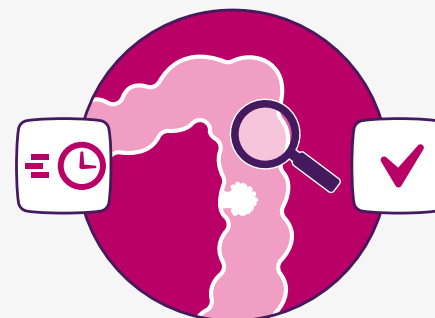

6 Sometimes a polyp grows and turns into colorectal cancer. Most people do not even notice.

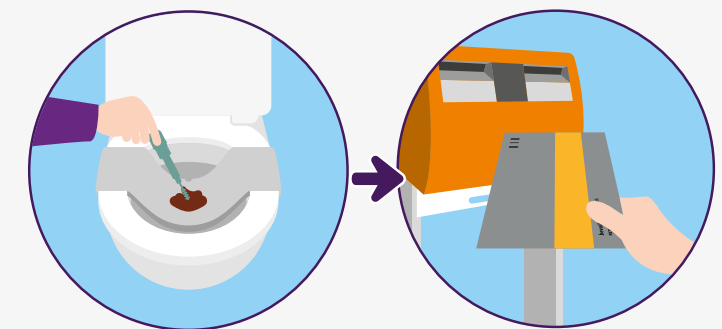

7 The self-test makes it possible to
discover a polyp or colorectal cancer.

8 If colorectal cancer is discovered in time,
can usually be treated effectively.

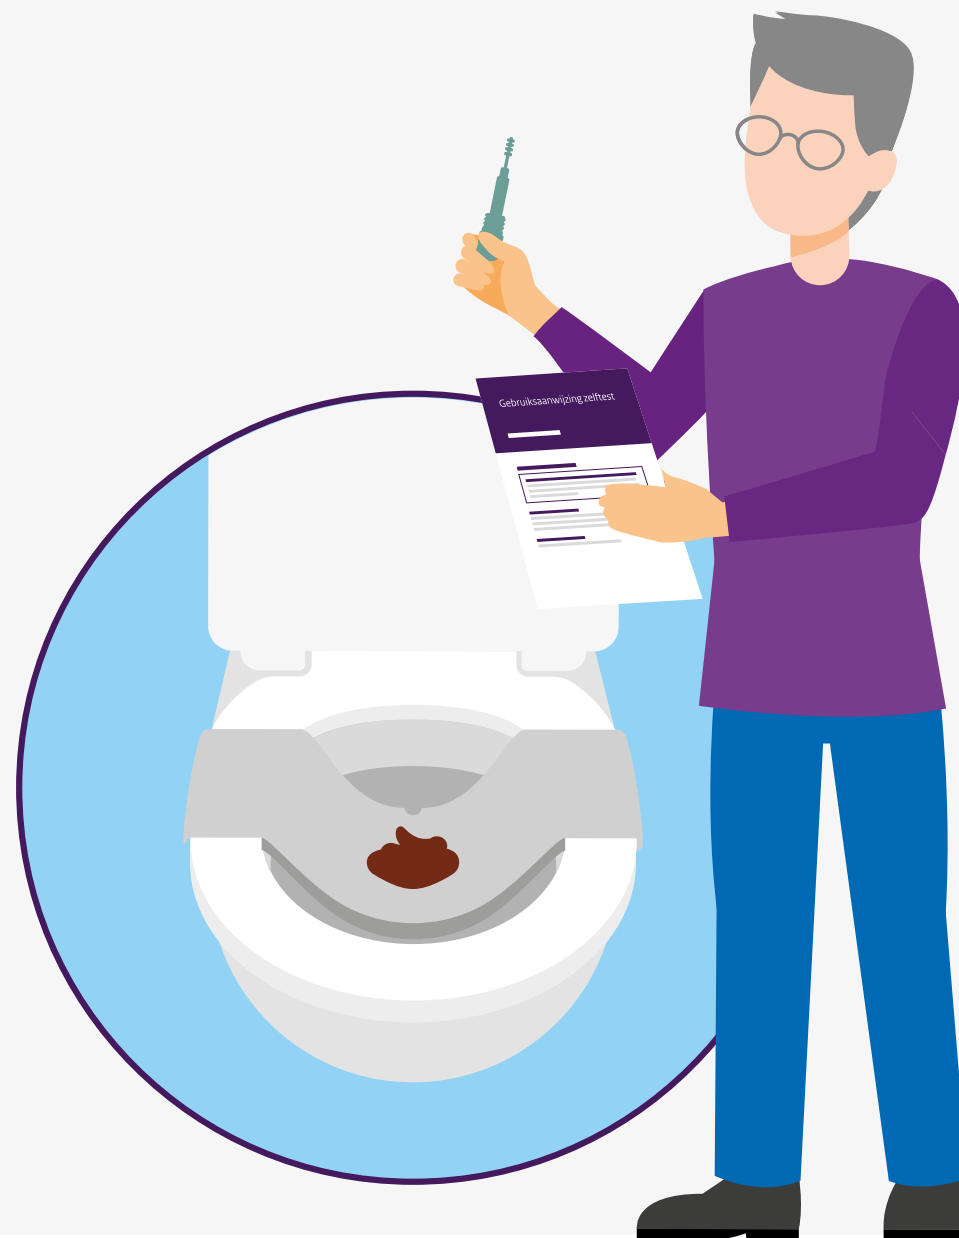

9 Would you like to take part?
Then use the self-test and send it in.
